- Provide technical support to clients.
- Adept at handling urgent tasks, even when priorities frequently shift.
- Able to work independently and efficiently without needing constant supervision.
- Create a proposal for websites/apps with estimations to present to potential clients.

PROFESSIONAL EXPERIENCE

Appycodes | Lead JavaScript/WordPress Developer
March 2020 to Present
Siliguri, West Bengal, India · Onsite

As a Lead Developer, I managed up to four projects at the same time, led a team of more than 8 developers, and was actively part of a development team on an ongoing project.

I handled many different types of projects, including big ones for large companies, creating custom WordPress plugins, customizing websites, making designs that work on all devices, and improving website performance. I also developed SASS apps and multiple mobile apps for Android and iOS.

- Developed SaaS apps using ReactJs / NextJs and NodeJs.
- Developed mobile apps using ReactNative for multiple startups.
- Developed a custom KYC module for WooCommerce using TWO, for Pay Later (BNPL) feature for a B2B E-commerce store, resulting in a remarkable 40% increase in GMV.
- Successfully managed an e-commerce website housing an extensive product inventory of over 1.2 Million items.
- Developed a custom plugin where vendors can easily import and export their catalogs with CSV and use them in any SaaS application for a B&B e-commerce website.
- Inspected, documented, and achieved performance improvements and optimizations a wide range of websites.

Mus Technologies Services Pvt. Ltd. | Junior Developer
Nov 2018 - Feb 2020
Siliguri, West Bengal, India · Onsite

As a Junior Developer, I learned a lot from seniors at that time. I was part of 4 developer team for an in-house Wallet app that provided various services like Mobile Recharge, paying bills, booking movies or travel tickets, etc. I helped the team with the backend services using PHP and also worked on the app that used ReactNative. App registered more than 1K users in the first week of launch.

- Build Various Reports for the back office using PHP and HTML/CSS.
- Created an admin portal for customer reports/dispute modules.
- Added Report/Dispute portal for the user app.
- Worked on a module to generate invoices and download it on user actions.
